Thomas Bennington DBI Construction Consultants 1261 Broadway, 9th Floor New York, New York 10001

> RE: Lead and Copper Water Testing Former Henry Bonsall Elementary School 1575 Mt. Ephraim Avenue Camden, New Jersey Whitman Project #19-07-19T

Dear Mr. Bennington:

The collection of water from the water fountains and faucets located in various locations throughout the facility was completed on July 30, 2019 by Mr. David Villar and Mr. Mark Costantino of Whitman. All water samples were transported to EMSL located in Cinnaminson, New Jersey for analysis of lead and copper content in potable water.

The analysis of the 68 water samples collected from various locations in the facility were found to be below the current standards for local, state and federal regulations for lead and copper in potable water.

The laboratory analysis results, and chain of custody are provided as an attachment to this letter.

Should you have any questions or require additional information, please feel free to contact our office at 732-390-5858.

Sincerely,

Kevin T. Lovely Senior Project Manager
